Net Asset Value of HUF series:	24,101,102,052 HUF
Net Asset Value per unit:	2.420175 HUF

## INVESTMENT POLICY OF THE FUND:

The fund's aim is to assemble an investment portfolio for its investors that is comprised of both Hungarian and international money and capital-market instruments, which the fund can optimise through ongoing dynamic asset allocation in order to attain the highest possible yield. The fund is a 'total-return fund', which means that instead of concentrating on just one subsector of the money or capital market, at any given moment it focuses its investments on the area that holds the promise of the highest possible return. Accordingly, the fund may hold government securities and discount treasury bills issued by the State Debt Management Centre (ÁKK) on behalf of the State of Hungary, as well as bonds issued by the National Bank of Hungary, and also bank and corporate bonds that are low risk but are nevertheless likely to earn a higher return than government securities. Besides these the fund's portfolio may also contain shares listed on the domestic stock exchange and the bourses of OECD countries, as well as the government securities, bank and corporate bonds of OECD countries. The fund does not follow a fixed benchmark, and does not adhere to a permanent ratio of shares to bonds, but aims to constantly change this ratio within a broad range; indeed, it is also prepared to take on currency risk (just as international bond/equity funds tend to) through the purchase of international government securities and equities. At the same time, the fund maintains the option to hedge currency risks.

very low	low	moderate	intermediate	significant	high	very high

## MARKET SUMMARY:

The portfolio's return during the month was enough for compensating the underperformance in January but year-to-date return remains under par. We increased our bond holding during the month. We increased local currency exposure in HUF, particularly in the mid curve as the central bank looks reluctant to raise rates despite the weak HUF, which will be gradually accepted by the market. We also bought Slovenian bonds, we still see space for spread compression to Italy/Spain. We reduced equity exposure, selling local equities, closing/reversing developed market longs. We end the month with a net equity exposure of 2-3%.

## ASSET ALLOCATION OF THE FUND ON 02/28/2014
