Total Net Asset Value of the whole Fund:	5,315,988,719 HUF
Net Asset Value of PI series:	104,080 PLN
Net Asset Value per unit:	1.040797 PLN

INVESTMENT POLICY OF THE FUND:

The fund aims to share in the yields of the Turkish equity market, and to profit from Turkey's economic growth through share price gains and dividend income. Given the risk profiles of the equity investments, the fund is classified as a high-risk investment. The fund manager's intentions are that the fund's portfolio should consist predominantly of the publicly traded shares of foreign-domiciled companies. The primary investment targets are the stock exchange-traded shares of companies that maintain an active presence in Turkey, or that generate a substantial proportion of their revenues in the Turkish market. When building the fund's portfolio, beyond the minimum statutory requirements, the principles of safety and maximum diversification (the spreading of risk) are observed. The fund management company, exercising all due care, determines the means of utilising the fund's resources on the basis of its own judgement and decisions, while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation and by taking into account the macroeconomic environment of the investment markets, relying primarily on fundamental analysis. When compiling the portfolio, it is shares that determine the nature of the fund, and thus the proportion of shares that may be held in the fund at any given moment may reach the prevailing statutory maximum. When determining the weights, within the equity investments, of shares traded in the Turkish market, we aim to ensure that the fund - in line with our expectations with regard to future risks and yields - achieves its objective, which is to outperform the benchmark advertised by the fund, over the longer term. The fund records its assets in forint; the fund management company may, at its own discretion, choose to hedge all or a part of its currency risks with forward currency positions, in compliance with the applicable statutory requirements. Under the current legislation the proportion of shares in the portfolio may be up to 100%.

MARKET SUMMARY:

March turned out to be a rollercoaster month for equities. European markets sold off on news of the Russian occupation of Crimea peninsula sparking fears that an escalation of the conflict is imminent. However, probabilities of the worst-case scenarios ranging from an open military conflict to a set of prolonged retaliatory sanctions kept decreasing during the second half of the month which brought some relief. Even though the FED went on with downsizing the QE programme, US markets remained more resilient to the negative newsflow of the unfolding Ukraine crisis to further deteriorating China macro data.

The Turkish equity market significantly appreciated during the month and outperformed the emerging markets. The Turkish stocks can profit from the intensified Russian political problems.

ASSET ALLOCATION OF THE FUND ON 03/31/2014
