Total Net Asset Value of the whole Fund:	13,522,386,610 HUF
Net Asset Value of EUR series:	338,297 EUR
Net Asset Value per unit:	3.870854 EUR

INVESTMENT POLICY OF THE FUND:

A primary consideration when compiling the fund's portfolio is the need to optimise the aggregate risk of the securities to be included in the fund. In the interest of reducing the risk, the utmost care is taken when selecting the securities to include in the fund's portfolio. The risk factors of the securities are analysed, and investment decisions are underpinned with in-depth calculations. An important criterion in the selection process is the liquidity of the securities. The fund buys shares issued by corporations from countries in the Central European region (primarily Hungary, Poland, the Czech Republic, Romania, Slovenia and Croatia, and secondarily, Austria, Russia and Turkey), but it may also invest in the shares of companies in other emerging and developed countries, as well as in other collective investment securities. The fund may hedge a part or all of its currency risks with forward currency positions. To ensure liquidity the fund aims to hold in its portfolio the government securities issued by the State Debt Management Centre (ÁKK) on behalf of the State of Hungary, but in accordance with the statutory regulations the proportion of shares in the portfolio may be up to 100%.

Annualized standard deviation of the fund's weekly yields:	17.09 %
Annualized standard deviation of the benchmark's weekly yields:	17.05 %

MARKET SUMMARY:

March turned out to be a rollercoaster month for equities. European markets sold off on news of the Russian occupation of Crimea peninsula sparking fears that an escalation of the conflict is imminent. However, probabilities of the worst-case scenarios ranging from an open military conflict to a set of prolonged retaliatory sanctions kept decreasing during the second half of the month which brought some relief. Even though the FED went on with downsizing the QE programme, US markets remained more resilient to the negative newsflow of the unfolding Ukraine crisis to further deteriorating China macro data.

The main issue in March was the Russian occupation of the Crimea peninsula. The CE3 region was just slightly negatively affected by the Ukrainian conflict as the strengthening of the German economy is likely to have a positive effect on these economies. Majority of the regional indices fell in March; the Polish WIG20 index fell by 2,4%, the Czech market declined by 1,3% and the Hungarian equity index lost 0,6% in EUR terms. Polish equities sold off sharply in sync with the broad market correction, but managed to recover the losses during the second half of March. LPP closed the month in the red due to RUB and UAH depreciation that will have a negative impact on the company net profit line in 1Q14 as it has significant exposure in Russia, and 4% of its sales generated in Ukraine.

ASSET ALLOCATION OF THE FUND ON 03/31/2014
