Total Net Asset Value of the whole Fund:	1,019,419,052 HUF
Net Asset Value of P series:	1,049,748 PLN
Net Asset Value per unit:	0.999760 PLN

### INVESTMENT POLICY OF THE FUND:

The aim of launching the investment fund was to give investors access to the Polish bond market, and for it to function as a relatively stable, medium-risk investment in the long term, offering our customers higher yields than those attainable on bank deposits without the need for them to tie up their savings for a fixed period. The investment opportunities available to the fund are wide-ranging, so the portfolio manager has a broad remit and there is scope to build up the optimal portfolio. We aim to achieve the highest return at the lowest risk. When making investment decisions we make equal use of fundamental analysis and technical analysis tools, and always take into account the prevailing mood of investors in the market. The portfolio manager determines the potential investment opportunities on the basis of the macroeconomic forecasts, the likely yield curve and the expected return on the curve and market volatility, then selects the investments that can be regarded as safe and that ensure a relatively high yield in return for the undertaken risk.

### MARKET SUMMARY:

Polish yields were almost unchanged the whole month after the early March rally, which was supported by quite stable core yields. Macro situation looks good, growth is gaining momentum without any visible inflation pressure. The central bank expanded its forward guidance, rates will be kept on hold until Q3 now. Q4 looks doubtful, inflation developments would not necessarily cry for tightening but there was already a MPC member talking about a rate hike sooner rather than later in Q4, considering the expected tightening path of the Fed. Technical picture looks positive as well, auction coverage is healthy despite the lack of pension funds while 60% of planned gross issuance is done for the year.

### ASSET ALLOCATION OF THE FUND ON 03/31/2014
