Total Net Asset Value of the whole Fund:	28,301,289 PLN
Net Asset Value of PLN series:	PLN
Net Asset Value per unit:	1.000000 PLN

INVESTMENT POLICY OF THE FUND:

The fund aims to share in the yields of the Polish equity market, and to profit from Poland's economic growth through share price gains and dividend income. Given the risk profiles of the equity investments, the fund is classified as a high-risk investment. The fund manager's intentions are that the fund's portfolio should consist predominantly of the publicly traded shares of foreign-domiciled companies. The fund's primary investment targets are the exchange-traded securities of companies that are active in Poland or that generate the bulk of their revenues there, or whose shares are listed on the Warsaw Stock Exchange. The fund may also invest in the shares of other Central and Eastern European corporations. These are listed as Austria, the Czech Republic, Hungary, Russia, Romania and Turkey; although the portfolio will always chiefly consist of the shares of companies listed on the Warsaw Stock Exchange. When building the fund's portfolio, beyond the minimum statutory requirements, the principles of safety and maximum diversification (the spreading of risk) are observed. Accordingly, only publicly issued securities listed or in the process of being listed on the stock exchange will be purchased as equity investments. The fund management company, exercising all due care, determines the means of utilising the fund's resources on the basis of its own judgement and decisions, while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation and by taking into account the macroeconomic environment of the investment markets, relying primarily on fundamental analysis. When compiling the portfolio, it is shares that determine the nature of the fund, and thus the proportion of shares that may be held in the fund at any given moment may reach the prevailing statutory maximum. The weights of the shares within the portfolio are determined so as to ensure that the fund - in line with our expectations with regard to future risks and yields - achieves its objective, which is to outperform the benchmark advertised by the fund, over the longer term. The fund holds more than 30% of its assets in a currency other than the domestic currency (HUF). In accordance with the current legislation, the proportion of shares in the portfolio may be up to 100%.

MARKET SUMMARY:

March turned out to be a rollercoaster month for equities. European markets sold off on news of the Russian occupation of Crimea peninsula sparking fears that an escalation of the conflict is imminent. However, probabilities of the worst-case scenarios ranging from an open military conflict to a set of prolonged retaliatory sanctions kept decreasing during the second half of the month which brought some relief. Even though the FED went on with downsizing the QE programme, US markets remained more resilient to the negative newsflow of the unfolding Ukraine crisis to further deteriorating China macro data.

The main issue in March was the Russian occupation of the Crimea peninsula. The CE3 region was just slightly negatively affected by the Ukrainian conflict as the strengthening of the German economy is likely to have a positive effect on these economies. Majority of the regional indices fell in March; the Polish WIG20 index fell by 2,4%, the Czech market declined by 1,3% and the Hungarian equity index lost 0,6% in EUR terms. Polish equities sold off sharply in sync with the broad market correction, but managed to recover the losses during the second half of March. LPP closed the month in the red due to RUB and UAH depreciation that will have a negative impact on the company net profit line in 1Q14 as it has significant exposure in Russia, and 4% of its sales generated in Ukraine.

ASSET ALLOCATION OF THE FUND ON 03/31/2014
