### INVESTMENT POLICY OF THE FUND:

The aim of launching the investment fund was to give investors access to the Polish bond market, and for it to function as a relatively stable, medium-risk investment in the long term, offering our customers higher yields than those attainable on bank deposits without the need for them to tie up their savings for a fixed period. The investment opportunities available to the fund are wide-ranging, so the portfolio manager has a broad remit and there is scope to build up the optimal portfolio. We aim to achieve the highest return at the lowest risk. When making investment decisions we make equal use of fundamental analysis and technical analysis tools, and always take into account the prevailing mood of investors in the market. The portfolio manager determines the potential investment opportunities on the basis of the macroeconomic forecasts, the likely yield curve and the expected return on the curve and market volatility, then selects the investments that can be regarded as safe and that ensure a relatively high yield in return for the undertaken risk.

### RISK INDICATORS FOR THE LAST 12 MONTHS:

Annualized standard deviation of the fund's weekly yields:	0.86 %
Annualized standard deviation of the benchmark's weekly yields:	0.69 %

### MARKET SUMMARY:

Polish bond market was supported by improving growth and benign inflation outlook, which coupled with a stable, low yield of developed market bonds. In addition, stable zloty and the dovish, but credible NBP were supportive of good price action too, after the geopolitical tensions coming from Ukraine had a mild effect on Polish bond market. Technical picture is favorable too: debt management agency issued more than 80% of the planned amount for 2014, which means: significant supply cannot be expected. Yield curve bull flattened: yields moved downward by 5-20 bps.
