Currency:	PLN
Total Net Asset Value of the whole Fund:	58,996,004 PLN
Net Asset Value of institutional series:	22,377,034 PLN
Net Asset Value per unit:	1.222761 PLN

## INVESTMENT POLICY OF THE FUND:

The fund aims to share in the yields of the Polish equity market, and to profit from Poland's economic growth through share price gains and dividend income. Given the risk profiles of the equity investments, the fund is classified as a high-risk investment. The fund manager's intentions are that the fund's portfolio should consist predominantly of the publicly traded shares of foreign-domiciled companies. The fund's primary investment targets are the exchange-traded securities of companies that are active in Poland or that generate the bulk of their revenues there, or whose shares are listed on the Warsaw Stock Exchange. The fund may also invest in the shares of other Central and Eastern European corporations. These are listed as Austria, the Czech Republic, Hungary, Russia, Romania and Turkey; although the portfolio will always chiefly consist of the shares of companies listed on the Warsaw Stock Exchange. When building the fund's portfolio, beyond the minimum statutory requirements, the principles of safety and maximum diversification (the spreading of risk) are observed. Accordingly, only publicly issued securities listed or in the process of being listed on the stock exchange will be purchased as equity investments. The fund management company, exercising all due care, determines the means of utilising the fund's resources on the basis of its own judgement and decisions, while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation and by taking into account the macroeconomic environment of the investment markets, relying primarily on fundamental analysis. When compiling the portfolio, it is shares that determine the nature of the fund, and thus the proportion of shares that may be held in the fund at any given moment may reach the prevailing statutory maximum. The weights of the shares within the portfolio are determined so as to ensure that the fund - in line with our expectations with regard to future risks and yields - achieves its objective, which is to outperform the benchmark advertised by the fund, over the longer term. The fund holds more than 30% of its assets in a currency other than the domestic currency (HUF). In accordance with the current legislation, the proportion of shares in the portfolio may be up to 100%.

## MARKET SUMMARY:

Most of the major equity indices closed the month almost flat, however, markets remained volatile throughout April. The Ukrainian crisis was one again in focus, as open military conflict has spread to Eastern and Southern part of Ukraine. European equities kept underperforming US markets as investors remained concerned about sanctions as well as diminishing economic outlook. The US earnings season delivered mixed results as the S&P500 companies managed to beat the consensus on the bottom line level, but failed to surpass expectations in terms of sales. China macro data showed further signs of deceleration in April, however, the pace of slowdown somewhat decreased. The FED went on with downsizing its QE programme in line with expectations, thus market reaction was muted.

In April the Hungarian equity index gained 0,3%, however the Polish WIG index fell by 1,8% and the Czech market declined by 0,5% in EUR terms. The macro picture in the CE3 region improved further despite the Ukrainian turmoil. Poland released strong figures in April; industrial output, gross wages and consumer confidence rose, however PMI eased a bit compared to last month. During the month the laggards were bought in Poland, so the best performers were the oil and gas, and the energy sector.

## ASSET ALLOCATION OF THE FUND ON 04/30/2014

Asset type	Weight
International equities	93.32 %
