Net Asset Value of HUF series:	14,765,763,603 HUF
Net Asset Value per unit:	2.202741 HUF

INVESTMENT POLICY OF THE FUND:

The aim of the fund is to function as a stable, very low-risk investment vehicle, but to offer investors better returns than bank deposits. The portfolio elements are selected in accordance with these principles. To ensure liquidity the fund manager primarily aims to hold government bonds and discount treasury bills distributed by the State Debt Management Centre (ÁKK), and bonds issued by the National Bank of Hungary. The average duration of the assets in the portfolio is 6 months, and the average remaining life of the assets may not exceed 12 months. The fund is low-risk, but its portfolio may also contain forint-denominated debt securities issued by banks and corporations, which are expected to ensure a higher return than government securities. In the case of floating rate, forint denominated debt securities the average duration is equal to the number of days remaining until the next interest payment day. The fund may also invest its liquid assets in bank deposits. Besides this, the fund may hold a limited proportion of foreign-currency instruments in its portfolio, but only subject to the full hedging of currency risk. Aegon Money Market Fund must hold minimum 80% of its assets in HUF-denominated bonds issued by the members of European Economic Area.

MARKET SUMMARY:

On April 24, the NBH announced its new self-financing plan, in order to improve the foreign currency composition of government debt (with a shift toward forint financing), to promote the contraction in the NBH's balance sheet and to decrease the interest expenditures of the public sector, by stimulating the Hungarian banking sector to hold government bonds instead of two-week NBH bills. The HUF reacted with prompt but moderate depreciation. The Hungarian bond market seems to be well supported by this programme: although, GDMA will increase its HUF bond supply, the buying interest was overwhelming in the first auctions after the announcement, while FX issuance is expected to be delayed for a significant period. Finally, the National Bank of Hungary cut the base rate by another 10 basis points to a new record low of 2.5%. All in all, the short end of the yield curve fell significantly in April: yield of 3M T-Bills decreased by 30-35 bps to 2,4-2,5%, yield of 1Y T-Bills decreased by 40-45 bps to 2,6-2,7%, 3x6 FRA fell by 13 bps, 9x12 FRA dropped by 20 bps.

ASSET ALLOCATION OF THE FUND ON 04/30/2014
