INVESTMENT POLICY OF THE FUND:

The fund aims to share in the yields on equity markets in the Asian region, and to profit from the region's economic growth through share price gains and dividend income. Given the risk profiles of the equity investments, the fund is classified as a high-risk investment. The fund invests its capital in equity-type instruments of the target countries. The fund aims to create an opportunity for investors to invest in equity markets that are representative of the Asian economies. The most important target countries are Hong Kong, India, China, South Korea and Taiwan, but the fund also invests in the capital markets of other Asian countries. This may be achieved through the purchase of individual shares or through collective investment instruments. The fund plans to invest predominantly in the latter, and accordingly, it primarily buys into exchange-traded funds (ETFs) and open-ended public investment funds. In accordance with our obligation under law, we draw the attention of all investors to the fact that the fund is a fund that invests in other investment funds; in other words, in accordance with its investment policy it may invest more than 80 percent of its assets in investment fund shares or securities issued by other collective investment instruments. However, the fund's portfolio will not contain shares of any single investment fund in a weight of over 20%. The fund only invests in investment vehicles whose expense ratio is less than 2.5%, though it always strives to ensure that the overall average fee burden does not exceed 1%.

MARKET SUMMARY:

Equity indices remained strong throughout May with both the S&P500 and the DAX breaking new all-time highs. Investors were less concerned about the negative newsflow coming from Eastern Ukraine and the escalation of the crisis to an open civil war, while the probability of tougher sanctions were gradually priced out from European markets. Economic indicators signaled a mixed picture with US economy regaining strength following the weather related issues, while most of the European macro data remained anemic.

The majority of Asian equity markets closed the month higher in USD terms. The Indian equity market hit new high thanks to the victory of the main opposition alliance BJP party.
