Net Asset Value of HUF series:	29,009,668 HUF
Net Asset Value per unit:	1.422896 HUF

INVESTMENT POLICY OF THE FUND:

The aim of the investment fund is to give investors access to the Polish bond market and to function as a relatively stable, medium-risk investment already medium term, offering our customers stable real returns without the need to tie up their savings for a fixed period. The fund primarily invests into Zloty denominated Polish government bonds but the portfolio manager has some room to use other fixed income investments. We aim to maximise returns with the given risk level. Our investment decisions are based on fundamental research extended by technical research while we also take into account global market sentiment. Expected shifts in the yield curve based on our macro expectations are at the core of our investment process. Risk/return characteristics are also considered when we select suitable and safe investments. We aim to totally hedge any currency risk in the fund.

MARKET SUMMARY:

We remained in a very benign fixed income environment in May. Emerging market sentiment is positive: the carry trade environment is flourishing and emerging currencies trade stronger. Polish macro remains supportive, inflation surprised on the downside again. Short yields are coming lower as the market prices low yields for longer. The chances of a rate cut have increased with a possible ECB move in the pipeline but with the expected robust GDP growth the Monetary Council remains reluctant to ease despite the strong PLN. The long end performed strongly as well and now follows periphery yields after some underperformance in the first quarter. Technical situation also supports the market as Poland has funded 80% of gross issuance needs by the end of May.

ASSET ALLOCATION OF THE FUND ON 05/31/2014
