INVESTMENT POLICY OF THE FUND:

The Fund's goal is to offer a stable and predictable yield at a low risk level for the investors. According to this the fund is only allowed to hold fixed income securities, which were primarily issued or guaranteed by Poland. To a limited extent it is allowed to buy bonds issued by the European Union (and its institutions), the European Central Bank, or the European Investment Bank, if the security is denominated in PLN and its credit rating is at least equal to Poland's rating. Securities issued or guaranteed by Poland can be held regardless of the credit rating up to 100% of the NAV. Maximum allowed duration of the fund is 0.5 year, while maximum weighted average maturity of the portfolio is 1 year. The Fund must limit investment in securities to those with a residual maturity until the legal redemption date of less than or equal to 2 years, provided that the time remaining until the next interest rate reset date is less than or equal to 397 days. To ensure liquidity the fund can also place bank deposits. All of the assets held by the fund are denominated in PLN.

MARKET SUMMARY:

We remained in a very benign fixed income environment in May. Emerging market sentiment is positive: the carry trade environment is flourishing and emerging currencies trade stronger. Polish macro remains supportive, inflation surprised on the downside again. Short yields are coming lower as the market prices low yields for longer. The chances of a rate cut have increased with a possible ECB move in the pipeline but with the expected robust GDP growth the Monetary Council remains reluctant to ease despite the strong PLN.
