Net Asset Value of HUF series:	3,102,457,931 HUF
Net Asset Value per unit:	1.556331 HUF

INVESTMENT POLICY OF THE FUND:

The aim of the fund is to provide investors with yields higher than those attainable in the money market, at low risk, through the purchase or sale of securities. The fund invests most of its available assets in domestic discount treasury bills and short-term government bonds - which have the purpose of protecting the investors' capital - while using the rest to purchase riskier instruments on spot and futures markets. Given its approach to the purchase of risky instruments, the fund falls into the category of absolute-return funds: it selects, from among the opportunities available in the domestic and international money and capital markets, the investments with the best expected yield/risk ratio. The fund management company, exercising all due care, based on its own judgement and decisions and while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation, determines the means of utilising the fund's resources, and the weights of the various investments within the portfolio, with a view to ensuring that the fund - in line with the our expectations with regard to future risks and returns - achieves its objective in the long term. The Fund offers capital protection for first trading day of every year under special condition. The capital protection is ensured by the investment policy of the Fund. Aegon Ózon Capital Protected Fund must hold minimum 80% of its assets in HUF-denominated bonds issued by the members of European Economic Area.

RISK INDICATORS FOR THE LAST 12 MONTHS:

Annualized standard deviation of the fund's weekly yields:	1.26 %
Annualized standard deviation of the benchmark's weekly yields:	0.54 %

MARKET SUMMARY:

We remained in a very benign fixed income environment in May. Emerging market sentiment is positive: the carry trade environment is flourishing and emerging currencies trade stronger. HUF is a slight underperformer in the region, but EURHUF levels close to 300 again show resilience despite the diminishing carry. Inflation is still surprising on the downside and the central bank is cutting rates further in small steps. The demand side on the market is strong as local banks are being forced out of the 2-week sterilisation instrument and buy government bills and bonds instead. With the May rate cut to 2.4% we are now below Poland in terms of base rate. The market is not pricing significantly more easing but the money market curve remains flat below the base rate level and a possible move by the ECB might trigger further action from the central bank.

ASSET ALLOCATION OF THE FUND ON 05/31/2014
