Net Asset Value of HUF series:	4,862,064,764 HUF
Net Asset Value per unit:	1.123522 HUF

INVESTMENT POLICY OF THE FUND:

The fund aims to profit from the return on global equity market investments, through share price gains and dividend income. The bulk of its portfolio is made up of the publicly listed shares of foreign companies. When building the fund's portfolio, beyond the minimum statutory requirements, the principles of safety and maximum diversification (the spreading of risk) are observed. Accordingly, the fund primarily buys publicly issued foreign securities that are listed on foreign stock exchanges, and secondarily, it may also invest in shares issued by Hungarian companies. The fund management company, exercising all due care, based on its own judgement and decisions, and while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation, determines the means of utilising the fund's resources, and the weights of the various investments within the portfolio, with a view to ensuring that the fund - in line with our expectations with regard to future risks and returns - achieves its objective in the long term. However, the fund is managed on the premise that when compiling the portfolio, it is shares that determine the nature of the fund. Accordingly, the proportion of shares that may be kept in the fund at any given moment may reach the prevailing statutory maximum. The fund management company is permitted, at its own discretion, to hedge all or a part of its currency risks with forward currency positions, in compliance with the statutory requirements. When compiling the share portfolio, taking into consideration the macroeconomic environment of the investment markets, the aim is to build up a long-term investment portfolio primarily on the basis of fundamental analyses. In accordance with the current legislation, the proportion of shares in the portfolio may be up to 100%.

MARKET SUMMARY:

Equity indices fluctuated near all time high levels throughout June on rather mixed news flow. The crisis in Ukraine escalated further to an open war, while Iraq also witnessed massive military conflicts as sunni insurgents seized control of larger cities. The FED went on with downsizing its QE programme in line with expectations, while the ECB announced a new set of LTRO also mentioning potential QE programmes, which boosted the performance of the periphery assets. China macro data showed early signs of stabilization in June after several months of continuous deceleration. Commodities rallied as industrial metals were supported by the set of better Chinese macro figures, while precious metals rallied on the ECB announcement. Crude oil also spiked to 1-year high buoyed by the military conflicts in Iraq. In terms of FX movements, following a substantial appreciation, the USD consolidated against the EUR.

ASSET ALLOCATION OF THE FUND ON 06/30/2014
