Total Net Asset Value of the whole Fund:	1,418,825,435 HUF
Net Asset Value of EUR series:	116,250 EUR
Net Asset Value per unit:	1.027720 EUR

INVESTMENT POLICY OF THE FUND:

The fund aims to share in the yields on equity markets in the Asian region, and to profit from the region's economic growth through share price gains and dividend income. Given the risk profiles of the equity investments, the fund is classified as a high-risk investment. The fund invests its capital in equity-type instruments of the target countries. The fund aims to create an opportunity for investors to invest in equity markets that are representative of the Asian economies. The most important target countries are Hong Kong, India, China, South Korea and Taiwan, but the fund also invests in the capital markets of other Asian countries. This may be achieved through the purchase of individual shares or through collective investment instruments. The fund plans to invest predominantly in the latter, and accordingly, it primarily buys into exchange-traded funds (ETFs) and open-ended public investment funds. In accordance with our obligation under law, we draw the attention of all investors to the fact that the fund is a fund that invests in other investment funds; in other words, in accordance with its investment policy it may invest more than 80 percent of its assets in investment fund shares or securities issued by other collective investment instruments. However, the fund's portfolio will not contain shares of any single investment fund in a weight of over 20%. The fund only invests in investment vehicles whose expense ratio is less than 2.5%, though it always strives to ensure that the overall average fee burden does not exceed 1%.

MARKET SUMMARY:

The global equity rally lost steam in July with several equity indices retreating from major tops during the second half of the month. Ukraine was once again in focus as the crisis intensified with the downing of the Malaysian plane. The further round of EU and US sanctions imposed on Russian economy proved to be the first ones materially affecting key sectors and listed companies. The set of US macro data published in July remained solid, while the FED went on with downsizing its QE programme in line with expectations. The US earnings season painted a relatively healthy picture compared to consensus estimates, while European companies once again failed to surpass expectations on the revenues level, which kept supporting the outperformance of US indices compared to European equities - the latter also negatively affected by Russian sanctions.

Sentiment on Asia clearly improved in July and it registered accelerating inflows. China's PMI beat the expectations and the overall macro picture improved. In line with market expectations the market friendly candidate - Jokowi - won the presidential election in Indonesia.

ASSET ALLOCATION OF THE FUND ON 07/31/2014
