Net Asset Value of HUF series:	42,864,658,188 HUF
Net Asset Value per unit:	4.532931 HUF

INVESTMENT POLICY OF THE FUND:

The fund is intended to serve as a stable, moderately low-risk form of investment, and to offer investors higher returns than bank deposits over the medium term. The portfolio elements are selected in accordance with the above principles. To ensure liquidity, the fund primarily aims to hold bonds and discount treasury bills issued by the State Debt Management Centre on behalf of the State of Hungary, as well as bonds issued by the National Bank of Hungary. The fund has a low risk profile, but its portfolio may also contain forint-denominated debt securities issued by banks and corporations, which are expected to yield a higher return than government securities. The fund may also keep its liquid assets in bank deposits. Besides this, the fund may hold a limited proportion of foreign-currency instruments in its portfolio, but only subject to the full hedging of currency risk. Aegon Domestic Bond Fund must hold minimum 80% of its assets in HUF-denominated bonds issued by the members of European Economic Area.

MARKET SUMMARY:

The market performed well in the first part of the month. Although valuation levels in absolute terms and relative to regional peers look rich, but stable local demand from banks and foreign interest on the back of the benign environment were able to push yields lower. By the end of the month signs of fatigue were to observe. The surprise 20bps rate cut by the central bank and the signal of the end of the easing cycle led to some profit taking and the weaker demand at the last auction in July both showed a declining buying strength. Close to the end of the month geopolitical risks and US rate hike fears were on the rise again, leading to massive sell-offs in emerging market bonds including Hungary.

ASSET ALLOCATION OF THE FUND ON 07/31/2014
