Total Net Asset Value of the whole Fund:	10,518,941,866 HUF
Net Asset Value of EUR series:	57,928 EUR
Net Asset Value per unit:	0.904499 EUR

INVESTMENT POLICY OF THE FUND:

The fund aims to profit from the return on global equity market investments, through share price gains and dividend income. The bulk of its portfolio is made up of the publicly listed shares of foreign companies. When building the fund's portfolio, beyond the minimum statutory requirements, the principles of safety and maximum diversification (the spreading of risk) are observed. Accordingly, the fund primarily buys publicly issued foreign securities that are listed on foreign stock exchanges, and secondarily, it may also invest in shares issued by Hungarian companies. The fund management company, exercising all due care, based on its own judgement and decisions, and while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation, determines the means of utilising the fund's resources, and the weights of the various investments within the portfolio, with a view to ensuring that the fund - in line with our expectations with regard to future risks and returns - achieves its objective in the long term. However, the fund is managed on the premise that when compiling the portfolio, it is shares that determine the nature of the fund. Accordingly, the proportion of shares that may be kept in the fund at any given moment may reach the prevailing statutory maximum. The fund management company is permitted, at its own discretion, to hedge all or a part of its currency risks with forward currency positions, in compliance with the statutory requirements. When compiling the share portfolio, taking into consideration the macroeconomic environment of the investment markets, the aim is to build up a long-term investment portfolio primarily on the basis of fundamental analyses. In accordance with the current legislation, the proportion of shares in the portfolio may be up to 100%.

MARKET SUMMARY:

The global equity rally lost steam in July with several equity indices retreating from major tops during the second half of the month. Ukraine was once again in focus as the crisis intensified with the downing of the Malaysian plane. The further round of EU and US sanctions imposed on Russian economy proved to be the first ones materially affecting key sectors and listed companies. The set of US macro data published in July remained solid, while the FED went on with downsizing its QE programme in line with expectations. The US earnings season painted a relatively healthy picture compared to consensus estimates, while European companies once again failed to surpass expectations on the revenues level, which kept supporting the outperformance of US indices compared to European equities - the latter also negatively affected by Russian sanctions.

The Euro depreciated further against the USD touching 10-month lows, while precious metals remained weak in USD terms. The fund benefitted from European underweight positions vs. slight US overweight.

ASSET ALLOCATION OF THE FUND ON 07/31/2014
