Net Asset Value of HUF series:	3,725,860,251 HUF
Net Asset Value per unit:	1.566831 HUF

INVESTMENT POLICY OF THE FUND:

The aim of the fund is to provide investors with yields higher than those attainable in the money market, at low risk, through the purchase or sale of securities. The fund invests most of its available assets in domestic discount treasury bills and short-term government bonds - which have the purpose of protecting the investors' capital - while using the rest to purchase riskier instruments on spot and futures markets. Given its approach to the purchase of risky instruments, the fund falls into the category of absolute-return funds: it selects, from among the opportunities available in the domestic and international money and capital markets, the investments with the best expected yield/risk ratio. The fund management company, exercising all due care, based on its own judgement and decisions and while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation, determines the means of utilising the fund's resources, and the weights of the various investments within the portfolio, with a view to ensuring that the fund - in line with the our expectations with regard to future risks and returns - achieves its objective in the long term. The Fund offers capital protection for first trading day of every year under special condition. The capital protection is ensured by the investment policy of the Fund. Aegon Ózon Capital Protected Fund must hold minimum 80% of its assets in HUF-denominated bonds issued by the members of European Economic Area.

RISK INDICATORS FOR THE LAST 12 MONTHS:

Annualized standard deviation of the fund's weekly yields: 1.12 %

Annualized standard deviation of the benchmark's weekly yields: 0.47 %

MARKET SUMMARY:

On Tuesday 22 July, for a considerable surprise the National Bank of Hungary lowered the base rate by a larger-than expected twenty basis points to a new record low of 2.10%. At the same time governor György Matolcsy announced that the easing cycle ended here and also gave a clear forward guidance: the base rate would remain at this level till the end of 2015 unless the inflation outlook changes significantly. Another main event of the month were the approach of the transformation of the two-week NBH bills into deposit and the decrease in supply of HTBs. Due to these technical factors short term yields fell further reaching 1.7%, deeply below the base rate. Meanwhile international sentiment started to change at the end of the month: EURHUF surged above 314, yield of the 10Yr HGB jumped by 65-70bps causing an extreme change between short term and long term Hungarian yields.

ASSET ALLOCATION OF THE FUND ON 07/31/2014
