Net Asset Value of P series:	2,094,299 PLN
Net Asset Value per unit:	1.049163 PLN

INVESTMENT POLICY OF THE FUND:

The aim of the investment fund is to give investors access to the Polish bond market and to function as a relatively stable, medium-risk investment already medium term, offering our customers stable real returns without the need to tie up their savings for a fixed period. The fund primarily invests into Zloty denominated Polish government bonds but the portfolio manager has some room to use other fixed income investments. We aim to maximise returns with the given risk level. Our investment decisions are based on fundamental research extended by technical research while we also take into account global market sentiment. Expected shifts in the yield curve based on our macro expectations are at the core of our investment process. Risk/return characteristics are also considered when we select suitable and safe investments. We aim to totally hedge any currency risk in the fund.

MARKET SUMMARY:

The slowing EU economy and Ukraine tensions are weighing on the Polish economy. Activity is slowing as manufacturing PMI printed its 6th consecutive monthly decline and is now below the 50 threshold. Retail sales were also disappointing, industrial production posted a small positive surprise while YoY CPI is now in negative territory. The central bank dropped its forward guidance and is now open to further rate cuts. A total of 50 bps is now priced in the yield curve but we can even imagine more easing. The curve remains very flat but given the supportive external environment and the central bank's easing bias we remain long duration.

ASSET ALLOCATION OF THE FUND ON 08/31/2014
