Net Asset Value of HUF series:	28,988,250,176 HUF
Net Asset Value per unit:	2.514384 HUF

INVESTMENT POLICY OF THE FUND:

The fund's aim is to assemble an investment portfolio for its investors that is comprised of both Hungarian and international money and capital-market instruments, which the fund can optimise through ongoing dynamic asset allocation in order to attain the highest possible yield. The fund is a 'total-return fund', which means that instead of concentrating on just one subsector of the money or capital market, at any given moment it focuses its investments on the area that holds the promise of the highest possible return. Accordingly, the fund may hold government securities and discount treasury bills issued by the State Debt Management Centre (ÁKK) on behalf of the State of Hungary, as well as bonds issued by the National Bank of Hungary, and also bank and corporate bonds that are low risk but are nevertheless likely to earn a higher return than government securities. Besides these the fund's portfolio may also contain shares listed on the domestic stock exchange and the bourses of OECD countries, as well as the government securities, bank and corporate bonds of OECD countries. The fund does not follow a fixed benchmark, and does not adhere to a permanent ratio of shares to bonds, but aims to constantly change this ratio within a broad range; indeed, it is also prepared to take on currency risk (just as international bond/equity funds tend to) through the purchase of international government securities and equities. At the same time, the fund maintains the option to hedge currency risks.

RISK INDICATORS FOR THE LAST 12 MONTHS:

Annualized standard deviation of the fund's weekly yields:	1.78 %
Annualized standard deviation of the benchmark's weekly yields:	0.48 %

MARKET SUMMARY:

The correction in early August was bad for every type of risky asset: equity markets fell, domestic bond yields increased and bond spreads widened. Although the fund still prefers to be long, we did some fine-tuning during the correction. We increased the exposure to European equities and raised domestic bond-duration, while swapping a part of our USD denominated EM government bonds into EUR denominated ones. We closed most of our short position in US bonds and opened a long position in oil to hedge geopolitical risks. Luckily the markets turned around fast and continued strengthening, so the fund could work off the setback experienced in early August.

ASSET ALLOCATION OF THE FUND ON 08/31/2014
