Net Asset Value of HUF series:	4,891,856,772 HUF
Net Asset Value per unit:	1.176136 HUF

INVESTMENT POLICY OF THE FUND:

The fund aims to profit from the return on global equity market investments, through share price gains and dividend income. The bulk of its portfolio is made up of the publicly listed shares of foreign companies. When building the fund's portfolio, beyond the minimum statutory requirements, the principles of safety and maximum diversification (the spreading of risk) are observed. Accordingly, the fund primarily buys publicly issued foreign securities that are listed on foreign stock exchanges, and secondarily, it may also invest in shares issued by Hungarian companies. The fund management company, exercising all due care, based on its own judgement and decisions, and while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation, determines the means of utilising the fund's resources, and the weights of the various investments within the portfolio, with a view to ensuring that the fund - in line with our expectations with regard to future risks and returns - achieves its objective in the long term. However, the fund is managed on the premise that when compiling the portfolio, it is shares that determine the nature of the fund. Accordingly, the proportion of shares that may be kept in the fund at any given moment may reach the prevailing statutory maximum. The fund management company is permitted, at its own discretion, to hedge all or a part of its currency risks with forward currency positions, in compliance with the statutory requirements. When compiling the share portfolio, taking into consideration the macroeconomic environment of the investment markets, the aim is to build up a long-term investment portfolio primarily on the basis of fundamental analyses. In accordance with the current legislation, the proportion of shares in the portfolio may be up to 100%.

MARKET SUMMARY:

Equity markets closed a rollercoaster month starting with steep declines followed by a solid recovery during the second half of August. The newsflow was once again about the further escalation of the crisis in Ukraine. European markets were hit hard on fears of sluggish growth outlook also exaggerated by sanction related worries and anaemic corporate earnings. US equity markets showed more resilience as the S&P kept outperforming the German DAX on solid macro data and substantially healthier corporate earnings trends. Chinese equities also showed relative strength amid the selloff, primarily supported by attractive valuations in historical terms. The Euro depreciated further against the USD hitting 12-month lows, while precious metals edged lower in USD terms. Regardless of the ongoing military conflicts in Iraq, crude prices remained under pressure due to fears of sluggish growth prospects throughout Europe.
