Net Asset Value of HUF series:	29,995,277,712 HUF
Net Asset Value per unit:	2.373580 HUF

INVESTMENT POLICY OF THE FUND:

The aim of the fund is to achieve a substantial yield for investors by taking high risks and making active use of derivative positions. The fund is decidedly high-risk, particularly due to the derivative positions it takes. The fund is willing to buy or sell all available investment instruments - domestic and foreign bonds, equities and other securities, indexes and currencies - provided it sees the opportunity to make substantial gains. In this respect the fund belongs in the category of opportunistic funds that pursue a multi-strategy investment approach. Within the multi-strategy approach pursued by the fund, 'global macro', 'long-short equity', 'convertible bond arbitrage' and 'managed futures'-type transactions dominate. In terms of asset class, the fund's investments can be divided into three main groups: it takes on extra risk in the bond, currency and equity markets, and in these markets it is prepared to take up both long and short positions within the maximum limits permitted by law, which currently allow double leverage for funds of this type. In its investment decision-making mechanism the fund assesses fundamental, technical and behavioural-psychological factors. The fund management company, exercising all due care, based on its own judgement and decisions, and while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation, determines the means of utilising the fund's resources, and the weights of the various investments within the portfolio, with a view to ensuring that the fund - in line with our expectations with regard to future risks and returns - achieves its objective in the long term. To ensure liquidity the fund aims to hold government securities issued by the State Debt Management Centre (ÁKK) on behalf of the State of Hungary.

Risk and Reward Profile:

MARKET SUMMARY:

Equity markets continued to fluctuate around historical highs throughout September. Once again the S&P 500 managed to break new all-time records fuelled by solid corporate earnings revision trajectories and the exceptional strength of the US economy. European indices, on the other hand, kept underperforming US ones as anemic growth prospects weighed on equity prices. China macro data also continued to disappoint with softer PMIs and a set of deteriorating underlying economic activity indicators published. With US interest rate hikes on the horizon and the ECB in the easing phase, the USD surged against all major currencies, particularly the EUR. Commodities tumbled across the board from crude prices to industrial metals, basic materials and precious metals due to the pressure stemming from the enormous USD appreciation and the weak European and Chinese growth outlook. We lowered the equity exposure in our fund, when the uptrend broke and the risk increased in terms of equity market correction. We kept the positions along the strengthening of the USD, but we closed our positions which trend to the weakening of the HUF.

ASSET ALLOCATION OF THE FUND ON 09/30/2014
