Total Net Asset Value of the whole Fund:	67,755,729 PLN
Net Asset Value of institutional series:	29,380,219 PLN
Net Asset Value per unit:	1.282666 PLN

INVESTMENT POLICY OF THE FUND:

The fund aims to share in the yields of the Polish equity market, and to profit from Poland's economic growth through share price gains and dividend income. Given the risk profiles of the equity investments, the fund is classified as a high-risk investment. The fund manager's intentions are that the fund's portfolio should consist predominantly of the publicly traded shares of foreign-domiciled companies. The fund's primary investment targets are the exchange-traded securities of companies that are active in Poland or that generate the bulk of their revenues there, or whose shares are listed on the Warsaw Stock Exchange. The fund may also invest in the shares of other Central and Eastern European corporations. These are listed as Austria, the Czech Republic, Hungary, Russia, Romania and Turkey; although the portfolio will always chiefly consist of the shares of companies listed on the Warsaw Stock Exchange. When building the fund's portfolio, beyond the minimum statutory requirements, the principles of safety and maximum diversification (the spreading of risk) are observed. Accordingly, only publicly issued securities listed or in the process of being listed on the stock exchange will be purchased as equity investments. The fund management company, exercising all due care, determines the means of utilising the fund's resources on the basis of its own judgement and decisions, while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation and by taking into account the macroeconomic environment of the investment markets, relying primarily on fundamental analysis. When compiling the portfolio, it is shares that determine the nature of the fund, and thus the proportion of shares that may be held in the fund at any given moment may reach the prevailing statutory maximum. The weights of the shares within the portfolio are determined so as to ensure that the fund - in line with our expectations with regard to future risks and yields - achieves its objective, which is to outperform the benchmark advertised by the fund, over the longer term. The fund holds more than 30% of its assets in a currency other than the domestic currency (HUF). In accordance with the current legislation, the proportion of shares in the portfolio may be up to 100%.

RISK INDICATORS FOR THE LAST 12 MONTHS:

Annualized standard deviation of the fund's weekly yields:	13.71 %
Annualized standard deviation of the benchmark's weekly yields:	13.96 %

MARKET SUMMARY:

Equity markets continued to fluctuate around historical highs throughout September. Once again the S&P 500 managed to break new all-time records fuelled by solid corporate earnings revision trajectories and the exceptional strength of the US economy. European indices, on the other hand, kept underperforming US ones as anemic growth prospects weighed on equity prices. China macro data also continued to disappoint with softer PMIs and a set of deteriorating underlying economic activity indicators published. With US interest rate hikes on the horizon and the ECB in the easing phase, the USD surged against all major currencies, particularly the EUR. Commodities tumbled across the board from crude prices to industrial metals, basic materials and precious metals due to the pressure stemming from the enormous USD appreciation and the weak European and Chinese growth outlook. The Polish equity market was the strongest in the region last month partly thanks to the positive outcome from the pension fund reform. However, macro figures were quite disappointing again. New orders fell for the third month running at a stronger rate which led to the first drop in output since June 2013. In addition to this industrial output declined sharply. Among individual names, LPP performed the best thanks to the announcement that it will be included into the FTSE index.

ASSET ALLOCATION OF THE FUND ON 09/30/2014
