Net Asset Value of PLN series:	18,703,943 PLN
Net Asset Value per unit:	1.073011 PLN

INVESTMENT POLICY OF THE FUND:

The fund's aim is to assemble an investment portfolio for its investors that is comprised of both Hungarian and international money and capital-market instruments, which the fund can optimise through ongoing dynamic asset allocation in order to attain the highest possible yield. The fund is a 'total-return fund', which means that instead of concentrating on just one subsector of the money or capital market, at any given moment it focuses its investments on the area that holds the promise of the highest possible return. Accordingly, the fund may hold government securities and discount treasury bills issued by the State Debt Management Centre (ÁKK) on behalf of the State of Hungary, as well as bonds issued by the National Bank of Hungary, and also bank and corporate bonds that are low risk but are nevertheless likely to earn a higher return than government securities. Besides these the fund's portfolio may also contain shares listed on the domestic stock exchange and the bourses of OECD countries, as well as the government securities, bank and corporate bonds of OECD countries. The fund does not follow a fixed benchmark, and does not adhere to a permanent ratio of shares to bonds, but aims to constantly change this ratio within a broad range; indeed, it is also prepared to take on currency risk (just as international bond/equity funds tend to) through the purchase of international government securities and equities. At the same time, the fund maintains the option to hedge currency risks.

RISK INDICATORS FOR THE LAST 12 MONTHS:

Annualized standard deviation of the fund's weekly yields:	2.00 %
Annualized standard deviation of the benchmark's weekly yields:	0.48 %

MARKET SUMMARY:

We experienced increasing volatility on both equity and fixed income markets. The strict communication of Fed and the improving US data in the first half of the month resulted in higher yields all over the world, accompanied by an appreciation of USD. The second half of the month the markets were correcting this rise of yields, as the asset buying program of the ECB started to deplete its' sources. Equities turned down from their local maximums by the end of the month, along with the underperformance of EM thanks to weak Chinese PMI and falling resource prices. We did not significantly change the bond position in the fund and we decreased the weight of stocks below 5% although not fast enough. Our contrarian oil long did not perform well despite the under positioning of the markets and the historic low valuation, the deteriorating fundamentals turned out to be more important.

ASSET ALLOCATION OF THE FUND ON 09/30/2014
