Total Net Asset Value of the whole Fund:	1,527,300,636 HUF
Net Asset Value of EUR series:	128,664 EUR
Net Asset Value per unit:	1.065713 EUR

## INVESTMENT POLICY OF THE FUND:

The fund aims to share in the yields on equity markets in the Asian region, and to profit from the region's economic growth through share price gains and dividend income. Given the risk profiles of the equity investments, the fund is classified as a high-risk investment. The fund invests its capital in equity-type instruments of the target countries. The fund aims to create an opportunity for investors to invest in equity markets that are representative of the Asian economies. The most important target countries are Hong Kong, India, China, South Korea and Taiwan, but the fund also invests in the capital markets of other Asian countries. This may be achieved through the purchase of individual shares or through collective investment instruments. The fund plans to invest predominantly in the latter, and accordingly, it primarily buys into exchange-traded funds (ETFs) and open-ended public investment funds. In accordance with our obligation under law, we draw the attention of all investors to the fact that the fund is a fund that invests in other investment funds; in other words, in accordance with its investment policy it may invest more than 80 percent of its assets in investment fund shares or securities issued by other collective investment instruments. However, the fund's portfolio will not contain shares of any single investment fund in a weight of over 20%. The fund only invests in investment vehicles whose expense ratio is less than 2.5%, though it always strives to ensure that the overall average fee burden does not exceed 1%.

Risk and Reward Profile:

## MARKET SUMMARY:

Equity markets closed a rollercoaster month starting with steep declines followed by a solid recovery during the second half of October. European indices kept underperforming US ones as anaemic growth prospects and downward earnings revision once again weighed on equity prices. Monetary policies were in the limelight throughout October as the Fed announced the end of QE in line with expectations, while the ECB went on with its bond buyback programme. The EUR tumbled to multi-year lows against the dollar weighing on commodities. On the last day of October Bank of Japan announced the expansion of monetary stimulus. Japanese equities strengthened more than 4 percent and yen weakened sharply on the news of money printing. In China inflation hit 5-year low in October mainly due to the correction in commodity prices. The low inflation gives further room to the Chinese government to introduce further stimulus.
