## INVESTMENT POLICY OF THE FUND:

The fund is intended to serve as a stable, moderately low-risk form of investment, and to offer investors higher returns than bank deposits over the medium term. The portfolio elements are selected in accordance with the above principles. To ensure liquidity, the fund primarily aims to hold bonds and discount treasury bills issued by the State Debt Management Centre on behalf of the State of Hungary, as well as bonds issued by the National Bank of Hungary. The fund has a low risk profile, but its portfolio may also contain forint-denominated debt securities issued by banks and corporations, which are expected to yield a higher return than government securities. The fund may also keep its liquid assets in bank deposits. Besides this, the fund may hold a limited proportion of foreign-currency instruments in its portfolio, but only subject to the full hedging of currency risk. Aegon Domestic Bond Fund must hold minimum 80% of its assets in HUF-denominated bonds issued by the members of European Economic Area.

Risk and Reward Profile:

## MARKET SUMMARY:

Domestic government bond market strengthened significantly in October. The collapsing commodity prices and slowing European growth created a favourable external environment as inflation rate across the globe could be stay on low level, while the ECB would be forced to act. We saw some correction in short yields as the liquidity situation normalized, but the long-end yields fell further following other markets in the region. The benchmark 10 year bond closed under 4% at the end of the month and the curve flattened. Our fund had an excellent month in terms of relative performance.

## ASSET ALLOCATION OF THE FUND ON 10/31/2014
