Net Asset Value of HUF series:	7,165,027,513 HUF
Net Asset Value per unit:	4.486842 HUF

## INVESTMENT POLICY OF THE FUND:

The objective of the fund is to invest in Central and Eastern European equities. The fund is offered for investors who would like to benefit from the long term performance of regional listed companies. The average equity exposure of the fund is 95%. A primary consideration when compiling the fund's portfolio is the need to optimize the aggregate risk of the securities to be included in the fund. In the interest of reducing the risk, the utmost care is taken when selecting the securities to include in the fund's portfolio. The fund buys shares issued by corporations from countries in the Central European region (primarily Hungary, Poland, the Czech Republic, Romania, Slovenia and Croatia, and secondarily, Austria, Russia and Turkey), but it may also invest in the shares of companies in other emerging and developed countries, as well as in other collective investment securities. The fund may hedge a part or all of its currency risks with forward currency positions. To ensure liquidity the fund aims to hold in its portfolio the government securities on behalf of the State of Hungary and bonds issued by the National Bank of Hungary, but in accordance with the statutory regulations the proportion of shares in the portfolio may be up to 100%.

## MARKET SUMMARY:

Equity markets closed a rollercoaster month starting with steep declines followed by a solid recovery during the second half of October. European indices kept underperforming US ones as anaemic growth prospects and downward earnings revision once again weighed on equity prices. Monetary policies were in the limelight throughout October as the Fed announced the end of QE in line with expectations, while the Bank of Japan announced the expansion of monetary stimulus and the ECB went on with its bond buyback programme. The EUR tumbled to multi-year lows against the dollar weighing on commodities.

Polish macro data were mixed in October. Industrial production was better than expected and PMI improved slightly, but retail sales growth missed the expectations. The Polish equities closed the month in the red. Among individual names Jeronimo Martins fell the most on the news that the company cut back its store openings plan. The Hungarian equity market closed the month in negative territory as well. Magyar Telekom performed the worst on the news of the planned tax on internet usage. However, at the end of October the introduction of the internet tax was cancelled after mass protests.
