Custodian:	Unicredit Bank Hungary Zrt.
Main distributor:	AEGON Hungary Fund Manager Ltd.
Benchmark composition:	95% Solactive Climate Change Index + 5% US Libor Total Return 1M Index
ISIN code:	HU0000707195
Start:	09/05/2008
Currency:	HUF
Total Net Asset Value of the whole Fund:	5,447,350 EUR
Net Asset Value of HUF series:	641,043,230 HUF
Net Asset Value per unit:	1.091420 HUF

## INVESTMENT POLICY OF THE FUND:

The aim of the fund is to profit from the return on climate change-related equity market investments, through share price gains and dividend income. Given the risk profiles of the equity investments, the fund is classified as a high-risk investment. The fund manager's intentions are that the fund's portfolio should consist predominantly of the publicly traded shares of foreign-domiciled companies. The primary investment targets are the securities of companies that earn most of their revenues from exploiting the business opportunities arising from global climate change (environmental management, energy efficiency, clean technologies etc.), harnessing alternative resources (renewable energy, water management, agricultural chemistry etc.) and from agricultural activity (biotechnology, animal husbandry, fish farming, agricultural technology, etc.). When building the fund's portfolio, beyond the minimum statutory requirements, the principles of safety and maximum diversification (the spreading of risk) are observed. Accordingly, the fund primarily buys publicly issued foreign securities that are listed on foreign stock exchanges, and secondarily, it may also invest in shares issued by Hungarian companies. The fund management company, exercising all due care, determines the means of utilising the fund's resources on the basis of its own judgement and decisions, while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation and by taking into account the macroeconomic environment of the investment markets, relying primarily on fundamental analysis. When compiling the portfolio, it is shares that determine the nature of the fund, and thus the proportion of shares that may be held in the fund at any given moment may reach the prevailing statutory maximum. The proportions, within the equity investments, of subsectors related to climate change, alternative energy sources and agricultural activity are determined so as to ensure that the fund - in line with our expectations with regard to future risks and yields - fulfils its objective, which is to outperform the thematic global sector index selected as the benchmark over the longer term. The fund records its assets in euro; the fund management company may, at its own discretion, choose to hedge all or a part of its currency risks with forward currency positions, in compliance with the applicable statutory requirements.

## DISTRIBUTORS

AEGON Magyarország Befektetési Alapkezelő Zrt., CONCORDE Értékpapír Zrt., Raiffeisen Bank Zrt., Unicredit Bank Hungary Zrt.

## NET YIELD PERFORMANCE OF THE FUND:

## MARKET SUMMARY:

Equity markets kept rising in November fuelled by further stimulus announcements in Europe and the tumbling energy prices. Oil prices nosedived by almost 20% in November on supply-demand imbalances as the OPEC did not change its production quota regardless of the mounting pressures on oil prices. Industrial metals also took a hit in sync with falling energy prices, while global equity markets were supported by the lower commodity price environment. European indices posted particularly strong performances throughout November -with the DAX leading the rally just a few points shy of its all-time high- as the ECB went on with announcing a further set of stimulus. Even though the S&P500 performed behind most of the European indices, it managed to hit all-time record highs in November amid the risk-on environment. Climate related equities performed mixed in November as alternative energy stocks were under pressure due to tumbling crude prices, while agriculture, water and waste linked sectors showed solid performances throughout the month.

## ASSET ALLOCATION OF THE FUND ON 11/30/2014

Asset type	Weight
International equities	96.47 %
Current account	4.04 %
