Net Asset Value of P series:	2,273,111 PLN
Net Asset Value per unit:	1.079782 PLN

INVESTMENT POLICY OF THE FUND:

The aim of the investment fund is to give investors access to the Polish bond market and to function as a relatively stable, medium-risk investment already medium term, offering our customers stable real returns without the need to tie up their savings for a fixed period. The fund primarily invests into Zloty denominated Polish government bonds but the portfolio manager has some room to use other fixed income investments. We aim to maximise returns with the given risk level. Our investment decisions are based on fundamental research extended by technical research while we also take into account global market sentiment. Expected shifts in the yield curve based on our macro expectations are at the core of our investment process. Risk/return characteristics are also considered when we select suitable and safe investments. We aim to totally hedge any currency risk in the fund.

RISK INDICATORS FOR THE LAST 12 MONTHS:

Annualized standard deviation of the fund's weekly yields: 2.14 %
Annualized standard deviation of the benchmark's weekly yields: 1.89 %

MARKET SUMMARY:

The Polish bond market looks quite divided. Long end bonds follow core and Eurozone periphery rates, thus weaker European macro data, collapsing oil price and Draghi's dovish comments drove yields to new lows. Quite the opposite, short end yields are higher, as market got disappointed as the fully priced 50 bp rate cut did not materialise. As a result of the above, the Polish is the flattest emerging market yield curve now, we wonder if it can remain this way for longer.

ASSET ALLOCATION OF THE FUND ON 11/30/2014
