Net Asset Value of HUF series:	4,791,166,175 HUF
Net Asset Value per unit:	1.200288 HUF

### INVESTMENT POLICY OF THE FUND:

The fund aims to profit from the return on global equity market investments, through share price gains and dividend income. The bulk of its portfolio is made up of the publicly listed shares of foreign companies. When building the fund's portfolio, beyond the minimum statutory requirements, the principles of safety and maximum diversification (the spreading of risk) are observed. Accordingly, the fund primarily buys publicly issued foreign securities that are listed on foreign stock exchanges, and secondarily, it may also invest in shares issued by Hungarian companies. The fund management company, exercising all due care, based on its own judgement and decisions, and while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation, determines the means of utilising the fund's resources, and the weights of the various investments within the portfolio, with a view to ensuring that the fund - in line with our expectations with regard to future risks and returns - achieves its objective in the long term. However, the fund is managed on the premise that when compiling the portfolio, it is shares that determine the nature of the fund. Accordingly, the proportion of shares that may be kept in the fund at any given moment may reach the prevailing statutory maximum. The fund management company is permitted, at its own discretion, to hedge all or a part of its currency risks with forward currency positions, in compliance with the statutory requirements. When compiling the share portfolio, taking into consideration the macroeconomic environment of the investment markets, the aim is to build up a long-term investment portfolio primarily on the basis of fundamental analyses. In accordance with the current legislation, the proportion of shares in the portfolio may be up to 100%.

 ☐ 4 years
 ☐ 5 years

Risk and Reward Profile:

☐ very low
 ☐ low
 ☐ moderate
 ☐ intermediate
 ☒ significant
 ☐ high
 ☐ very high

### MARKET SUMMARY:

Equity markets kept rising in November fuelled by further stimulus announcements in Europe and the tumbling energy prices. Oil prices nosedived by almost 20% in November on supply-demand imbalances as the OPEC did not change its production quota regardless of the mounting pressures on oil prices. Industrial metals also took a hit in sync with falling energy prices, while global equity markets were supported by the lower commodity price environment. European indices posted particularly strong performances throughout November -with the DAX leading the rally just a few points shy of its all-time high- as the ECB went on with announcing a further set of stimulus. Even though the S&P500 performed behind most of the European indices, it managed to hit all-time record highs in November amid the risk-on environment. The fund benefitted from DAX overweight positions in November, while started to add some selective commodity linked exposures amid the selloff.

### ASSET ALLOCATION OF THE FUND ON 11/30/2014
