Net Asset Value of HUF series:	5,687,207,691 HUF
Net Asset Value per unit:	1.418235 HUF

INVESTMENT POLICY OF THE FUND:

The aim of the fund is to create for its investors an investment portfolio that generates a positive yield under all circumstances; in other words, it takes a 'total return' approach. It does this by using various analysis techniques to select the asset classes and investment funds that have the greatest potential to appreciate in value, and by investing in the shares of investment funds and in collective investment securities. The fund primarily invests its capital in the funds managed by Aegon Hungary Investment Fund Management, but it may also purchase other investment funds and collective investment securities for its portfolio for the purpose of diversification, if the given asset class is not yet covered by the fund management company's own funds. Indirectly, the fund is capable of accessing the entire known investment universe of today through the purchase of investment fund shares (in bond markets, money markets, equity markets, property market, private equity, derivatives and other regulated and OTC derivative products, commodity-market products, currencies etc.), and of making its investments both at domestic and international level. To ensure liquidity, the fund may hold discount treasury bills and government bonds issued by the State Debt Management Centre (ÁKK), interest-bearing securities guaranteed by the State of Hungary, and bonds issued by the National Bank of Hungary. In order to achieve a positive yield, the fund makes active use of risk management procedures and carefully selects the position size of its riskier investments. Since the range of investments includes foreign currency-denominated investments, ETFs and investment fund shares, investors in the fund are also exposed to currency risk. In accordance with our obligation under law, we draw the attention of all investors to the fact that the fund is a fund that invests in other investment funds; in other words, in accordance with its investment policy it may invest more than 80 percent of its assets in investment fund shares or securities issued by other collective investment instruments. However, the fund's portfolio will not contain shares of any single investment fund in a weight of over 20%, except AEGON Money Market Fund, AEGON Domestic Bond Fund, AEGON MoneyMaxx Express Fund, AEGON Alfa Derivative Fund, AEGON Central European Credit Fund and AEGON Ózon Capital Protected Fund.

AEGON Central European Credit Fund	25.8%
AEGON Ózon Capital Protected Fund	8.6%
AEGON Money Market Fund	4.3%
AEGON Domestic Bond Fund	2.6%
AEGON Central European Equity Fund	0.9%
AEGON EuroExpress Fund	0.0%
Total:	100%

MARKET SUMMARY:

Equity markets kept rising in November fuelled by further stimulus announcements in Europe and the tumbling energy prices. Oil prices nosedived by almost 20% in November on supply-demand imbalances as the OPEC did not change its production quota regardless of the mounting pressures on oil prices. Industrial metals also took a hit in sync with falling energy prices, while global equity markets were supported by the lower commodity price environment. European indices posted particularly strong performances throughout November -with the DAX leading the rally just a few points shy of its all-time high- as the ECB went on with announcing a further set of stimulus. Even though the S&P500 performed behind most of the European indices, it managed to hit all-time record highs in November amid the risk-on environment. We still prefer the total return funds and the Credit Fund within the fixed income asset class.
