Net Asset Value of PLN series:	19,090,633 PLN
Net Asset Value per unit:	1.055050 PLN

INVESTMENT POLICY OF THE FUND:

The Fund's goal is to offer a stable and predictable yield at a low risk level for the investors. According to this the fund is only allowed to hold fixed income securities, which were primarily issued or guaranteed by Poland. To a limited extent it is allowed to buy bonds issued by the European Union (and its institutions), the European Central Bank, or the European Investment Bank, if the security is denominated in PLN and its credit rating is at least equal to Poland's rating. Securities issued or guaranteed by Poland can be held regardless of the credit rating up to 100% of the NAV. Maximum allowed duration of the fund is 0.5 year, while maximum weighted average maturity of the portfolio is 1 year. The Fund must limit investment in securities to those with a residual maturity until the legal redemption date of less than or equal to 2 years, provided that the time remaining until the next interest rate reset date is less than or equal to 397 days. To ensure liquidity the fund can also place bank deposits. All of the assets held by the fund are denominated in PLN.

MARKET SUMMARY:

The NBP kept rates on hold in December (reference rate at 2%), as expected. The official statement was neutral overall. The MPC remained focused on growth as the main potential trigger for further monetary easing. As the MPC was very cautious and needed continuous confirmation before the 50 bps rate cut earlier, in the short run we do not expect a further change in the reference rate. This is reinforced by the fact, that NBP President sounded marginally more upbeat on growth noting the slight improvement in recent activity data, in our view. Nearing the year end, the demand-supply mismatch and the remaining rate cut expectations pulled down the short term yields.

ASSET ALLOCATION OF THE FUND ON 12/31/2014
