Total Net Asset Value of the whole Fund:	13,979,019,751 HUF
Net Asset Value of EUR series:	146,063 EUR
Net Asset Value per unit:	1.087411 EUR

## INVESTMENT POLICY OF THE FUND:

The fund aims to profit from the return on global equity market investments, through share price gains and dividend income. The bulk of its portfolio is made up of the publicly listed shares of foreign companies. When building the fund's portfolio, beyond the minimum statutory requirements, the principles of safety and maximum diversification (the spreading of risk) are observed. Accordingly, the fund primarily buys publicly issued foreign securities that are listed on foreign stock exchanges, and secondarily, it may also invest in shares issued by Hungarian companies. The fund management company, exercising all due care, based on its own judgement and decisions, and while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation, determines the means of utilising the fund's resources, and the weights of the various investments within the portfolio, with a view to ensuring that the fund - in line with our expectations with regard to future risks and returns - achieves its objective in the long term. However, the fund is managed on the premise that when compiling the portfolio, it is shares that determine the nature of the fund. Accordingly, the proportion of shares that may be kept in the fund at any given moment may reach the prevailing statutory maximum. The fund management company is permitted, at its own discretion, to hedge all or a part of its currency risks with forward currency positions, in compliance with the statutory requirements. When compiling the share portfolio, taking into consideration the macroeconomic environment of the investment markets, the aim is to build up a long-term investment portfolio primarily on the basis of fundamental analyses. In accordance with the current legislation, the proportion of shares in the portfolio may be up to 100%.

## MARKET SUMMARY:

Equity markets kept surging throughout February primarily fuelled by ECB stimulus and the benign effects of low oil prices. Most of the major developed indices managed to break new all time highs, even the Nasdaq composite approached its dotcom bubble era highs set in 2000. European indices once again outperformed the S&P500 in February on weak euro and healthier corporate earnings revisions. The US earnings season painted a mixed picture with above consensus Q4 figures, though soft FY earnings revision trends on FX and oil-linked issues. Crude oil prices performed mixed as the Brent kept rising in February, while the WTI remained flat on storage capacity concerns.

The fund slightly overweighted European equities vs. US ones, and also benefitted from some oil-linked selective equity positions.
