Net Asset Value of HUF series:	5,438,383,381 HUF
Net Asset Value per unit:	1.591873 HUF

INVESTMENT POLICY OF THE FUND:

The aim of the fund is to provide investors with yields higher than those attainable in the money market, at low risk, through the purchase or sale of securities. The fund invests most of its available assets in domestic discount treasury bills and short-term government bonds - which have the purpose of protecting the investors' capital - while using the rest to purchase riskier instruments on spot and futures markets. Given its approach to the purchase of risky instruments, the fund falls into the category of absolute-return funds: it selects, from among the opportunities available in the domestic and international money and capital markets, the investments with the best expected yield/risk ratio. The fund management company, exercising all due care, based on its own judgement and decisions and while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation, determines the means of utilising the fund's resources, and the weights of the various investments within the portfolio, with a view to ensuring that the fund - in line with the our expectations with regard to future risks and returns - achieves its objective in the long term. The Fund offers capital protection for first trading day of every year under special condition. The capital protection is ensured by the investment policy of the Fund. Aegon Ózon Capital Protected Fund must hold minimum 80% of its assets in HUF-denominated bonds issued by the members of European Economic Area.

RISK INDICATORS FOR THE LAST 12 MONTHS:

Annualized standard deviation of the fund's weekly yields: 0.59 %
Annualized standard deviation of the benchmark's weekly yields: 0.49 %

MARKET SUMMARY:

On 27 January, the NBH left the base rate at 2.10%, in line with our and market economists consensus expectations. However, market pricing has shifted towards a more dovish interest rate outlook following the risk rally on the ECB QE announcement, pricing a decreasing base rate path, with the base rate around 1.7% at the end of this year. As rate cuts are unlikely to be an effective channel to stimulate growth, my base case scenario is that key rate is will be unchanged and the NBH may target monetary loosening via the extension of the FGS. However, rate cut(s) can not be ruled out, but the first step may happen as early as March with the new Inflation Report. György Matolcsy announced plans to expand the FGS (currently available only to SMEs) to large companies. According to the governor, the NBH may seek to extend a gross HUF1trn of funding this year after HUF500bn in 2014. The FGS was successful in 2013, when net new SME lending increased by HUF 756bln.

ASSET ALLOCATION OF THE FUND ON 01/31/2015
