Total Net Asset Value of the whole Fund:	11,682,042,012 HUF
Net Asset Value of HUF series:	11,682,042,012 HUF
Net Asset Value per unit:	2.238660 HUF

INVESTMENT POLICY OF THE FUND:

The aim of the fund is to function as a stable, very low-risk investment vehicle, but to offer investors better returns than bank deposits. The portfolio elements are selected in accordance with these principles. To ensure liquidity the fund manager primarily aims to hold government bonds and discount treasury bills distributed by the State Debt Management Centre (ÁKK), and bonds issued by the National Bank of Hungary. The average duration of the assets in the portfolio is 6 months, and the average remaining life of the assets may not exceed 12 months. The fund is low-risk, but its portfolio may also contain forint-denominated debt securities issued by banks and corporations, which are expected to ensure a higher return than government securities. In the case of floating rate, forint denominated debt securities the average duration is equal to the number of days remaining until the next interest payment day. The fund may also invest its liquid assets in bank deposits. Besides this, the fund may hold a limited proportion of foreign-currency instruments in its portfolio, but only subject to the full hedging of currency risk. Aegon Money Market Fund must hold minimum 80% of its assets in HUF-denominated bonds issued by the members of European Economic Area.

MARKET SUMMARY:

On 24th March, the NBH started a new cycle and cut the base rate by 15 bps to 1.95%. The cut was widely expected as decision makers had previously signaled that they would revise the base rate path based on the new forecasts of the March Inflation Report. The main numbers from the new Inflation Report are 0.0% and 2.6% average annual inflation rates for 2015 and 2016 respectively, and 3.2% and 2.5% real GDP growth rates. There was a muted change in money market rates after the change. The market still prices a decreasing base rate path. Our expectation is 2-3 more rate cuts and as a result the base rate can reach the level of 1.6-1.7% this year. More interestingly, the Monetary Council decided on a ± 1 percentage point tolerance band around the 3% inflation target, which gives more flexibility and highly likely means a more prolonged period of loose monetary conditions.

ASSET ALLOCATION OF THE FUND ON 03/31/2015
