INVESTMENT POLICY OF THE FUND:

The objective of the fund is to invest in Central and Eastern European equities. The fund is offered for investors who would like to benefit from the long term performance of regional listed companies. The average equity exposure of the fund is 95%. A primary consideration when compiling the fund's portfolio is the need to optimize the aggregate risk of the securities to be included in the fund. In the interest of reducing the risk, the utmost care is taken when selecting the securities to include in the fund's portfolio. The fund buys shares issued by corporations from countries in the Central European region (primarily Hungary, Poland, the Czech Republic, Romania, Slovenia and Croatia, and secondarily, Austria, Russia and Turkey), but it may also invest in the shares of companies in other emerging and developed countries, as well as in other collective investment securities. The fund may hedge a part or all of its currency risks with forward currency positions. To ensure liquidity the fund aims to hold in its portfolio the government securities on behalf of the State of Hungary and bonds issued by the National Bank of Hungary, but in accordance with the statutory regulations the proportion of shares in the portfolio may be up to 100%.

MARKET SUMMARY:

Major developed equity markets started April with hitting new all time highs. However, the second half of the month brought in some profit taking. European equities suffered a substantial correction for the first time in several months as bond yields spiked. The EURUSD retested the multi-year lows set in March, then staged a correction following the steep declines. Oil prices edged higher hitting YTD highs buoyed by a massive downscale in US drilling activity as well as easing storage capacity concerns.

The Polish equity market rose further in April. The macro picture is positive, retail sales increased and industrial production was better than expected. The labor market proved strong as unemployment rate decreased and gross wages increased. In April, oil and gas sector and banks performed the best. The Hungarian equity market proved to be the best performer in the region. Regarding individual names MOL share price surged on much stronger refinery margins.
