Net Asset Value of HUF series:	5,989,413,944 HUF
Net Asset Value per unit:	1.320969 HUF

INVESTMENT POLICY OF THE FUND:

The fund aims to profit from the return on global equity market investments, through share price gains and dividend income. The bulk of its portfolio is made up of the publicly listed shares of foreign companies. When building the fund's portfolio, beyond the minimum statutory requirements, the principles of safety and maximum diversification (the spreading of risk) are observed. Accordingly, the fund primarily buys publicly issued foreign securities that are listed on foreign stock exchanges, and secondarily, it may also invest in shares issued by Hungarian companies. The fund management company, exercising all due care, based on its own judgement and decisions, and while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation, determines the means of utilising the fund's resources, and the weights of the various investments within the portfolio, with a view to ensuring that the fund - in line with our expectations with regard to future risks and returns - achieves its objective in the long term. However, the fund is managed on the premise that when compiling the portfolio, it is shares that determine the nature of the fund. Accordingly, the proportion of shares that may be kept in the fund at any given moment may reach the prevailing statutory maximum. The fund management company is permitted, at its own discretion, to hedge all or a part of its currency risks with forward currency positions, in compliance with the statutory requirements. When compiling the share portfolio, taking into consideration the macroeconomic environment of the investment markets, the aim is to build up a long-term investment portfolio primarily on the basis of fundamental analyses. In accordance with the current legislation, the proportion of shares in the portfolio may be up to 100%.

Risk and Reward Profile:

MARKET SUMMARY:

Major developed equity markets started April with hitting new all time highs. However, the second half of the month brought in some profit taking. European equities suffered a substantial correction for the first time in several months as bond yields spiked. The EURUSD retested the multi-year lows set in March, then staged a correction following the steep declines. Oil prices edged higher hitting YTD highs buoyed by a massive downscale in US drilling activity as well as easing storage capacity concerns. The fund closed its slight European overweight vs. US equities and benefitted from some selective commodity linked equity positions.

ASSET ALLOCATION OF THE FUND ON 04/30/2015
