## INVESTMENT POLICY OF THE FUND:

The aim of the fund is to provide investors with yields higher than those attainable in the money market, at low risk, through the purchase or sale of securities. The fund invests most of its available assets in domestic discount treasury bills and short-term government bonds - which have the purpose of protecting the investors' capital - while using the rest to purchase riskier instruments on spot and futures markets. Given its approach to the purchase of risky instruments, the fund falls into the category of absolute-return funds: it selects, from among the opportunities available in the domestic and international money and capital markets, the investments with the best expected yield/risk ratio. The fund management company, exercising all due care, based on its own judgement and decisions and while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation, determines the means of utilising the fund's resources, and the weights of the various investments within the portfolio, with a view to ensuring that the fund - in line with the our expectations with regard to future risks and returns - achieves its objective in the long term. The Fund offers capital protection for first trading day of every year under special condition. The capital protection is ensured by the investment policy of the Fund. Aegon Ózon Capital Protected Fund must hold minimum 80% of its assets in HUF-denominated bonds issued by the members of European Economic Area.

## RISK INDICATORS FOR THE LAST 12 MONTHS:

Annualized standard deviation of the fund's weekly yields: 0.56 %

Annualized standard deviation of the benchmark's weekly yields: 0.28 %

## MARKET SUMMARY:

On 21 April, the NBH cut the base rate by another 15 bps to 1.8%. The continuation of the rate cut cycle was widely expected. Domestic money market rates started to react for changes in the base rate: yields of the HTBs decreased by 5-10 bps during the month. Looking at the future developments: the market prices a decreasing base rate path. In our base scenario we expect 2 more rate cuts by 15 bps, which means that the base rate would sink to 1,5%.
