Net Asset Value of EUR series:	1,436,824 EUR
Net Asset Value per unit:	4.217086 EUR

## INVESTMENT POLICY OF THE FUND:

The objective of the fund is to invest in Central and Eastern European equities. The fund is offered for investors who would like to benefit from the long term performance of regional listed companies. The average equity exposure of the fund is 95%. A primary consideration when compiling the fund's portfolio is the need to optimize the aggregate risk of the securities to be included in the fund. In the interest of reducing the risk, the utmost care is taken when selecting the securities to include in the fund's portfolio. The fund buys shares issued by corporations from countries in the Central European region (primarily Hungary, Poland, the Czech Republic, Romania, Slovenia and Croatia, and secondarily, Austria, Russia and Turkey), but it may also invest in the shares of companies in other emerging and developed countries, as well as in other collective investment securities. The fund may hedge a part or all of its currency risks with forward currency positions. To ensure liquidity the fund aims to hold in its portfolio the government securities on behalf of the State of Hungary and bonds issued by the National Bank of Hungary, but in accordance with the statutory regulations the proportion of shares in the portfolio may be up to 100%.

## MARKET SUMMARY:

Emerging markets ex China corrected though, but DM equity markets were simply range trading in the month.

Bond yields seem to have bottomed though, bringing meaningful rises in long-term bond yields in the US, Germany, and the European periphery. The dollar stuck in a fairly wide range opening the way for a meaningful short term rally in the euro.

Equity indices in the CEE region closed the month in the negative territory and the Polish equity market proved to be the worst. Mr. Andrzej Duda supported by Law and Justice party (L&J) won the presidential elections in Poland receiving 51.5% of votes. The campaign include imposing a tax on bank assets and supermarkets, reducing retirement age and forced conversion of CHF denominated loan to PLN. The recent victory significantly increased L&J's chance to win the parliamentary elections scheduled for October/ November this year. Polish equity market fell on growing uncertainty about the prospect of the Polish economy and on rising political risk.
