Net Asset Value of HUF series:	5,467,508,002 HUF
Net Asset Value per unit:	1.605669 HUF

INVESTMENT POLICY OF THE FUND:

The aim of the fund is to provide investors with yields higher than those attainable in the money market, at low risk, through the purchase or sale of securities. The fund invests most of its available assets in domestic discount treasury bills and short-term government bonds - which have the purpose of protecting the investors' capital - while using the rest to purchase riskier instruments on spot and futures markets. Given its approach to the purchase of risky instruments, the fund falls into the category of absolute-return funds: it selects, from among the opportunities available in the domestic and international money and capital markets, the investments with the best expected yield/risk ratio. The fund management company, exercising all due care, based on its own judgement and decisions and while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation, determines the means of utilising the fund's resources, and the weights of the various investments within the portfolio, with a view to ensuring that the fund - in line with the our expectations with regard to future risks and returns - achieves its objective in the long term. The Fund offers capital protection for first trading day of every year under special condition. The capital protection is ensured by the investment policy of the Fund. Aegon Ózon Capital Protected Fund must hold minimum 80% of its assets in HUF-denominated bonds issued by the members of European Economic Area.

MARKET SUMMARY:

The National Bank of Hungary continued its rate cut cycle in May and decreased the base rate from 1,8% to 1,65%. The pace was in line with analyst expectation, thus market reaction was quite muted on the Hungarian money markets. The comment of the Monetary Committee was still dovish and the possibility has increased that the bottom of the rate cut cycle might be lower than what the analysts are expecting (1,5%). T-bills managed to move lower in yields during the month, the average yield on the weekly auctions decreased by 6 basispoints in May.

ASSET ALLOCATION OF THE FUND ON 05/31/2015
