Net Asset Value of HUF series:	11,082,027,290 HUF
Net Asset Value per unit:	2.246272 HUF

INVESTMENT POLICY OF THE FUND:

The aim of the fund is to function as a stable, very low-risk investment vehicle, but to offer investors better returns than bank deposits. The portfolio elements are selected in accordance with these principles. To ensure liquidity the fund manager primarily aims to hold government bonds and discount treasury bills distributed by the State Debt Management Centre (ÁKK), and bonds issued by the National Bank of Hungary. The average duration of the assets in the portfolio is 6 months, and the average remaining life of the assets may not exceed 12 months. The fund is low-risk, but its portfolio may also contain forint-denominated debt securities issued by banks and corporations, which are expected to ensure a higher return than government securities. In the case of floating rate, forint denominated debt securities the average duration is equal to the number of days remaining until the next interest payment day. The fund may also invest its liquid assets in bank deposits. Besides this, the fund may hold a limited proportion of foreign-currency instruments in its portfolio, but only subject to the full hedging of currency risk. Aegon Money Market Fund must hold minimum 80% of its assets in HUF-denominated bonds issued by the members of European Economic Area.

Risk and Reward Profile:

MARKET SUMMARY:

The National Bank of Hungary continued its rate cut cycle in May and decreased the base rate from 1,8% to 1,65%. The pace was in line with analyst expectation, thus market reaction was quite muted on the Hungarian money markets. The comment of the Monetary Committee was still dovish and the possibility has increased that the bottom of the rate cut cycle might be lower than what the analysts are expecting (1,5%). T-bills managed to move lower in yields during the month, the average yield on the weekly auctions decreased by 6 basispoints in May.

ASSET ALLOCATION OF THE FUND ON 05/31/2015
