Net Asset Value of HUF series:	38,010,899,200 HUF
Net Asset Value per unit:	4.775632 HUF

INVESTMENT POLICY OF THE FUND:

The fund is intended to serve as a stable, moderately low-risk form of investment, and to offer investors higher returns than bank deposits over the medium term. The portfolio elements are selected in accordance with the above principles. To ensure liquidity, the fund primarily aims to hold bonds and discount treasury bills issued by the State Debt Management Centre on behalf of the State of Hungary, as well as bonds issued by the National Bank of Hungary. The fund has a low risk profile, but its portfolio may also contain forint-denominated debt securities issued by banks and corporations, which are expected to yield a higher return than government securities. The fund may also keep its liquid assets in bank deposits. Besides this, the fund may hold a limited proportion of foreign-currency instruments in its portfolio, but only subject to the full hedging of currency risk. Aegon Domestic Bond Fund must hold minimum 80% of its assets in HUF-denominated bonds issued by the members of European Economic Area.

MARKET SUMMARY:

The government bond yield curve continued to steepen. Short yields are well anchored by the dovish central bank and local banks' demand boosted by central bank measures. Money market yields trade way below the base rate given the supply demand imbalance. Long yields are less strong as Greek news and rising core yields weighed on investor sentiment but the market remains supported by local banking books' appetite. Foreign holdings decreased further. 3-year yields traded around 2.10, 10 bps lower than a month ago, while 10-year yields were around 3.90 rising almost 50 bps during May.
