Total Net Asset Value of the whole Fund:	2,446,119,873 HUF
Net Asset Value of EUR series:	161,273 EUR
Net Asset Value per unit:	1.203412 EUR

INVESTMENT POLICY OF THE FUND:

The fund aims to share in the yields on equity markets in the Asian region, and to profit from the region's economic growth through share price gains and dividend income. Given the risk profiles of the equity investments, the fund is classified as a high-risk investment. The fund invests its capital in equity-type instruments of the target countries. The fund aims to create an opportunity for investors to invest in equity markets that are representative of the Asian economies. The most important target countries are Hong Kong, India, China, South Korea and Taiwan, but the fund also invests in the capital markets of other Asian countries. This may be achieved through the purchase of individual shares or through collective investment instruments. The fund plans to invest predominantly in the latter, and accordingly, it primarily buys into exchange-traded funds (ETFs) and open-ended public investment funds. In accordance with our obligation under law, we draw the attention of all investors to the fact that the fund is a fund that invests in other investment funds; in other words, in accordance with its investment policy it may invest more than 80 percent of its assets in investment fund shares or securities issued by other collective investment instruments. However, the fund's portfolio will not contain shares of any single investment fund in a weight of over 20%. The fund only invests in investment vehicles whose expense ratio is less than 2.5%, though it always strives to ensure that the overall average fee burden does not exceed 1%.

RISK INDICATORS FOR THE LAST 12 MONTHS:

Annualized standard deviation of the fund's weekly yields:	18.88 %
Annualized standard deviation of the benchmark's weekly yields:	18.13 %

MARKET SUMMARY:

Major developed equity markets fluctuated in July without clear trends. Fears of a Greek default eased throughout the month as investors once again focused on China slowdown concerns marked by particularly weak manufacturing and consumption data as well as a meltdown in Chinese equity markets. The dismal China newsflow weighed on emerging indices which lagged behind developed ones. The US earnings season painted a mixed picture as several leaders of the rally published softening guidances. Commodity prices remained under pressure due to the ongoing slowdown in China macro prospects. Crude oil prices tumbled on the unfortunate mix of sluggish China macro data, the peaking of the driving season and the Iranian nuclear deal, which may add to the supply glut.

Chinese equity markets suffered a substantial correction again in July. Chinese regulator announced a set of policies to stabilize the equity market but it did not prove to be successful enough. Shanghai Composite index trades on March levels and is above 200 moving average so far.

ASSET ALLOCATION OF THE FUND ON 07/31/2015
