INVESTMENT POLICY OF THE FUND:

The fund is intended to serve as a stable, moderately low-risk form of investment, and to offer investors higher returns than bank deposits over the medium term. The portfolio elements are selected in accordance with the above principles. To ensure liquidity, the fund primarily aims to hold bonds and discount treasury bills issued by the State Debt Management Centre on behalf of the State of Hungary, as well as bonds issued by the National Bank of Hungary. The fund has a low risk profile, but its portfolio may also contain forint-denominated debt securities issued by banks and corporations, which are expected to yield a higher return than government securities. The fund may also keep its liquid assets in bank deposits. Besides this, the fund may hold a limited proportion of foreign-currency instruments in its portfolio, but only subject to the full hedging of currency risk. Aegon Domestic Bond Fund must hold minimum 80% of its assets in HUF-denominated bonds issued by the members of European Economic Area.

MARKET SUMMARY:

Market sentiment soothed after the Greferendum, as the negotiations resumed between Greece and the EU leaders. Accordingly, long-term Hungarian bond yields decreased by 40 bps compared to the beginning of July. However, this rally disappeared by the end of the month as yields increased by approximately 20bps. Meanwhile, foreign investors further reduced their Hungarian government bond holdings. Yet, bid/cover ratios remained firm, as domestic market participants - especially banks - generated additional demand on the primary market. The National Bank of Hungary cut the rate to a new historical low of 1,35% while communicating the end of the easing cycle. As a consequence of the rate cut, short-term yields dropped to the domain of 0,9%. The steepness of the yield curve slightly decreased throughout July. However, 3-year bond yields increased by 16bps to 2,22% by the end of the month.
