INVESTMENT POLICY OF THE FUND:

The Fund's goal is to offer a stable and predictable yield at a low risk level for the investors. According to this the fund is only allowed to hold fixed income securities, which were primarily issued or guaranteed by Poland. To a limited extent it is allowed to buy bonds issued by the European Union (and its institutions), the European Central Bank, or the European Investment Bank, if the security is denominated in PLN and its credit rating is at least equal to Poland's rating. Securities issued or guaranteed by Poland can be held regardless of the credit rating up to 100% of the NAV. Maximum allowed duration of the fund is 0.5 year, while maximum weighted average maturity of the portfolio is 1 year. The Fund must limit investment in securities to those with a residual maturity until the legal redemption date of less than or equal to 2 years, provided that the time remaining until the next interest rate reset date is less than or equal to 397 days. To ensure liquidity the fund can also place bank deposits. All of the assets held by the fund are denominated in PLN.

MARKET SUMMARY:

Polish bond market had a strong month this time: the yield curve bull flattened with a 20-25 bps decrease in yields of the belly and a 35-40 bps decrease in the long end. Meanwhile short-end yields decreased by a decent 5-10 bps. The NBP kept rates on hold in July, as widely expected, but the focus was on global developments rather than on local news. With growth concerns and falling equity prices in China, global commodity prices (especially oil and precious metals) came under severe pressure altering global inflation expectations significantly. In Europe favorable supply/demand technicals (huge redemptions versus moderate issuance plus ongoing QE) fueled the bond rally, while in US we haven't got any strong signal regarding an eventual lift-off in September, that coupled with mixed data and a very weak employment cost index at the end of the month that was a further catalyst for a sharp decrease in bond yields. At the same time local political uncertainty in Poland remained with us increasing the risk premium of the country.
