Total Net Asset Value of the whole Fund:	15,226,206,416 HUF
Net Asset Value of EUR series:	185,761 EUR
Net Asset Value per unit:	1.100977 EUR

INVESTMENT POLICY OF THE FUND:

The fund aims to profit from the return on global equity market investments, through share price gains and dividend income. The bulk of its portfolio is made up of the publicly listed shares of foreign companies. When building the fund's portfolio, beyond the minimum statutory requirements, the principles of safety and maximum diversification (the spreading of risk) are observed. Accordingly, the fund primarily buys publicly issued foreign securities that are listed on foreign stock exchanges, and secondarily, it may also invest in shares issued by Hungarian companies. The fund management company, exercising all due care, based on its own judgement and decisions, and while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation, determines the means of utilising the fund's resources, and the weights of the various investments within the portfolio, with a view to ensuring that the fund - in line with our expectations with regard to future risks and returns - achieves its objective in the long term. However, the fund is managed on the premise that when compiling the portfolio, it is shares that determine the nature of the fund. Accordingly, the proportion of shares that may be kept in the fund at any given moment may reach the prevailing statutory maximum. The fund management company is permitted, at its own discretion, to hedge all or a part of its currency risks with forward currency positions, in compliance with the statutory requirements. When compiling the share portfolio, taking into consideration the macroeconomic environment of the investment markets, the aim is to build up a long-term investment portfolio primarily on the basis of fundamental analyses. In accordance with the current legislation, the proportion of shares in the portfolio may be up to 100%.

MARKET SUMMARY:

Major developed equity markets fluctuated in July without clear trends. Fears of a Greek default eased throughout the month as investors once again focused on China slowdown concerns marked by particularly weak manufacturing and consumption data as well as a meltdown in Chinese equity markets. The dismal China newsflow weighed on emerging indices which lagged behind developed ones. The US earnings season painted a mixed picture as several leaders of the rally published softening guidances. Commodity prices remained under pressure due to the ongoing slowdown in China macro prospects. Crude oil prices tumbled on the unfortunate mix of sluggish China macro data, the peaking of the driving season and the Iranian nuclear deal, which may add to the supply glut.

The fund kept neutral equity weight in July, while added selective commodity linked exposures.

ASSET ALLOCATION OF THE FUND ON 07/31/2015
