Net Asset Value of institutional series:	1,276,662,840 HUF
Net Asset Value per unit:	1.869786 HUF

INVESTMENT POLICY OF THE FUND:

The fund aims to share in the yields of the Russian equity market, and to profit from Russia's economic growth through share price gains and dividend income. Given the risk profiles of the equity investments, the fund is classified as a high-risk investment. The fund's portfolio primarily consists of the publicly issued shares of foreign companies. The main investment targets are the stock exchange-traded shares of companies that maintain an active presence in Russia or the former CIS states, or which generate the bulk of their revenues in these countries. When building the fund's portfolio, beyond the minimum statutory requirements, the principles of safety and maximum diversification (the spreading of risk) are observed. The fund management company, exercising all due care, determines the means of utilising the fund's resources on the basis of its own judgement and decisions, while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation and by taking into account the macroeconomic environment of the investment markets, relying primarily on fundamental analysis. When compiling the portfolio, it is shares that determine the nature of the fund, and thus the proportion of shares that may be held in the fund at any given moment may reach the prevailing statutory maximum. The weights, within the portfolio, of shares traded in the Russian market are determined with a view to ensuring that the fund - in line with our expectations with regard to future risks and yields - achieves its objective, which is to outperform the benchmark advertised by the fund, over the longer term. The fund records its assets in forint; the fund management company may, at its own discretion, choose to hedge all or a part of its currency risks with forward currency positions, in compliance with the applicable statutory requirements. Under the current legislation the proportion of shares in the portfolio may be up to 100%.

RISK INDICATORS FOR THE LAST 12 MONTHS:

Annualized standard deviation of the fund's weekly yields: 37.91 %

Annualized standard deviation of the benchmark's weekly yields: 37.93 %

MARKET SUMMARY:

Major developed equity markets fluctuated in July without clear trends. Fears of a Greek default eased throughout the month as investors once again focused on China slowdown concerns marked by particularly weak manufacturing and consumption data as well as a meltdown in Chinese equity markets. The dismal China newsflow weighed on emerging indices which lagged behind developed ones. The US earnings season painted a mixed picture as several leaders of the rally published softening guidances. Commodity prices remained under pressure due to the ongoing slowdown in China macro prospects. Crude oil prices tumbled on the unfortunate mix of sluggish China macro data, the peaking of the driving season and the Iranian nuclear deal, which may add to the supply glut. Emerging markets suffered a correction again in July. The Russian equity market performance was weak due to the weakening of the ruble and oil prices.

ASSET ALLOCATION OF THE FUND ON 07/31/2015
