Net Asset Value of HUF series:	8,163,422,317 HUF
Net Asset Value per unit:	1.433975 HUF

INVESTMENT POLICY OF THE FUND:

The aim of the fund is to create for its investors an investment portfolio that generates a positive yield under all circumstances; in other words, it takes a 'total return' approach. It does this by using various analysis techniques to select the asset classes and investment funds that have the greatest potential to appreciate in value, and by investing in the shares of investment funds and in collective investment securities. The fund primarily invests its capital in the funds managed by Aegon Hungary Investment Fund Management, but it may also purchase other investment funds and collective investment securities for its portfolio for the purpose of diversification, if the given asset class is not yet covered by the fund management company's own funds. Indirectly, the fund is capable of accessing the entire known investment universe of today through the purchase of investment fund shares (in bond markets, money markets, equity markets, property market, private equity, derivatives and other regulated and OTC derivative products, commodity-market products, currencies etc.), and of making its investments both at domestic and international level. To ensure liquidity, the fund may hold discount treasury bills and government bonds issued by the State Debt Management Centre (ÁKK), interest-bearing securities guaranteed by the State of Hungary, and bonds issued by the National Bank of Hungary. In order to achieve a positive yield, the fund makes active use of risk management procedures and carefully selects the position size of its riskier investments. Since the range of investments includes foreign currency-denominated investments, ETFs and investment fund shares, investors in the fund are also exposed to currency risk. In accordance with our obligation under law, we draw the attention of all investors to the fact that the fund is a fund that invests in other investment funds; in other words, in accordance with its investment policy it may invest more than 80 percent of its assets in investment fund shares or securities issued by other collective investment instruments. However, the fund's portfolio will not contain shares of any single investment fund in a weight of over 20%, except AEGON Money Market Fund, AEGON Domestic Bond Fund, AEGON MoneyMaxx Express Fund, AEGON Alfa Derivative Fund, AEGON Central European Credit Fund and AEGON Ózon Capital Protected Fund.

Aegon Domestic Bond Fund	1.8%
Aegon EuroExpress Fund	0.0%
Total:	100%

MARKET SUMMARY:

Major developed equity markets fluctuated in July without clear trends. Fears of a Greek default eased throughout the month as investors once again focused on China slowdown concerns marked by particularly weak manufacturing and consumption data as well as a meltdown in Chinese equity markets. The dismal China newsflow weighed on emerging indices which lagged behind developed ones. The US earnings season painted a mixed picture as several leaders of the rally published softening guidances. Commodity prices remained under pressure due to the ongoing slowdown in China macro prospects. Crude oil prices tumbled on the unfortunate mix of sluggish China macro data, the peaking of the driving season and the Iranian nuclear deal, which may add to the supply glut.

No changes were made in the portfolio in June.
