Net Asset Value of HUF series:	5,446,196,292 HUF
Net Asset Value per unit:	1.260220 HUF

INVESTMENT POLICY OF THE FUND:

The fund aims to profit from the return on global equity market investments, through share price gains and dividend income. The bulk of its portfolio is made up of the publicly listed shares of foreign companies. When building the fund's portfolio, beyond the minimum statutory requirements, the principles of safety and maximum diversification (the spreading of risk) are observed. Accordingly, the fund primarily buys publicly issued foreign securities that are listed on foreign stock exchanges, and secondarily, it may also invest in shares issued by Hungarian companies. The fund management company, exercising all due care, based on its own judgement and decisions, and while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation, determines the means of utilising the fund's resources, and the weights of the various investments within the portfolio, with a view to ensuring that the fund - in line with our expectations with regard to future risks and returns - achieves its objective in the long term. However, the fund is managed on the premise that when compiling the portfolio, it is shares that determine the nature of the fund. Accordingly, the proportion of shares that may be kept in the fund at any given moment may reach the prevailing statutory maximum. The fund management company is permitted, at its own discretion, to hedge all or a part of its currency risks with forward currency positions, in compliance with the statutory requirements. When compiling the share portfolio, taking into consideration the macroeconomic environment of the investment markets, the aim is to build up a long-term investment portfolio primarily on the basis of fundamental analyses. In accordance with the current legislation, the proportion of shares in the portfolio may be up to 100%.

Risk and Reward Profile:

MARKET SUMMARY:

China related concerns intensified with the devaluation of the CNY triggering a meltdown in global equities. The selling spree hit all major equity indices with the DJIA registering its worst 1-day drop in points. Commodities were also routed as crude oil hit new lows amid the panic selling, but staged a massive 3-day rebound and closed August at practically unchanged levels. Expectations of a further delay of the first FED rate hike weighed on the USD which sold off sharply but recovered by the end of August.

The fund held practically neutral equity weight, while slightly overweighted regional equities vs. developed ones.

ASSET ALLOCATION OF THE FUND ON 08/31/2015
