INVESTMENT POLICY OF THE FUND:

The aim of the fund is to function as a stable, very low-risk investment vehicle, but to offer investors better returns than bank deposits. The portfolio elements are selected in accordance with these principles. To ensure liquidity the fund manager primarily aims to hold government bonds and discount treasury bills distributed by the State Debt Management Centre (ÁKK), and bonds issued by the National Bank of Hungary. The average duration of the assets in the portfolio is 6 months, and the average remaining life of the assets may not exceed 12 months. The fund is low-risk, but its portfolio may also contain forint-denominated debt securities issued by banks and corporations, which are expected to ensure a higher return than government securities. In the case of floating rate, forint denominated debt securities the average duration is equal to the number of days remaining until the next interest payment day. The fund may also invest its liquid assets in bank deposits. Besides this, the fund may hold a limited proportion of foreign-currency instruments in its portfolio, but only subject to the full hedging of currency risk. Aegon Money Market Fund must hold minimum 80% of its assets in HUF-denominated bonds issued by the members of European Economic Area.

MARKET SUMMARY:

On 25 August, the NBH kept rates on hold, as it was widely expected. The tone and the language of the statement remained largely unchanged. We expect the NBH to remain on hold in terms of the base rate for prolonged period of time. In the meantime, the NBH will continue to ease monetary conditions indirectly, through the upcoming change in its monetary policy tools (effective in September): participants of Hungarian money market started to prepare for changes intensively, as the yield of HTBs decreased by 15-20 bps further.

As we hold higher duration in our Fund, we could capitalize on these changes.
