MARKET SUMMARY:

Equity markets followed the August trends and a broader selloff unfolded during the month. The center of the storm was emerging markets at the beginning but it later spilled over to other developed markets. The selloff was very hectic, large draw downs were followed by sharp upward spikes multiple times. By the end of the month EM managed to stabilize and it was the DM equities which generated most of the volatility. The fund built net equity shorts during the month but the timing was such that the spikes had a negative net effect on the NAV. In term of fx, the fund was short in ZAR, SGD and AUD against JPY for most of the period.
